welcome

GAYA

This Corporate Identity manual was created to offer you a visual representation of our brand and to explain how to correctly depict our brand identity. It is a visual framework to ensure our corporate image is cohesive and consistent. The integrity of our brand is based on this proper, cohesive, and consistent styling. Please take care, the responsibility is yours to embrace.

The CIM will guide you in the application of the corporate identity in all of your communication activities. If you have any questions, do not hesitate to contact us. GAYA wishes you every success in the daily building of its corporate image.

“your brand is the single most important investment you can make in business”

- Steve Forbes

logotype

VISUAL ELEMENT

Our logo represents us in and every way. It unifies us internally and externally, and communicates who we are. The logo is the symbol that is most often used and allows people to easily recognize us.

HORIZONTAL LOGO

VERTICAL LOGO

look and feel principles

01 Our isotype comes in one colour, orange and needs some space to breathe.

02 Do not use any other colours except white or black.

03 Do not scale, distort, or rotate the logo: any resizing must be done in proportion

04 Do not change the position of the logomark's elements

05 If there is a dark background, use the white logo with white lettering.

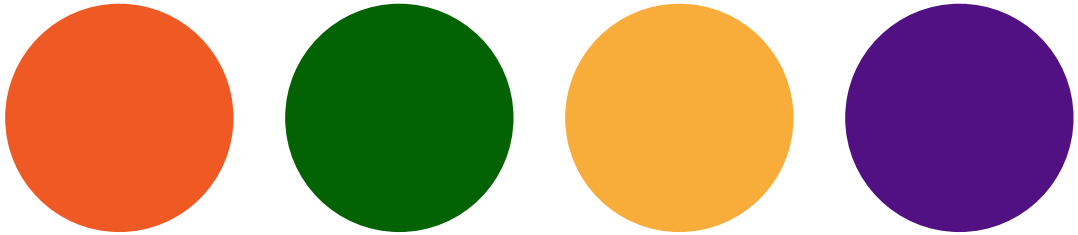

06 It's flat 2D graphics. No 3D. No drop shadow.

07 Do not add any embellishments such as drop shadow, glow, stroke, etc

colors

VISUAL ELEMENT

The following colors are the only ones which may be used for GAYA's logo. No other colours may be used or substituted for our logo.

The harmonious blend of colours allow for great flexibility in design while providing a consistent brand colour scheme for all communications.

When used correctly, the logo colour palette generates a strong brand unity and creates visually stunning materials that reflect the brand name.

brand color system

GAYA

Color palette is made up of four colors : **orange, green, yellow, purple**
Below you'll find the description of the various color systems: CMYK, RGB and Web.CMYK colors (Cyan, Magenta, Yellow, Black) are used for professional print jobs. RGB colors (Red, Green, Blue) are used for the Web, videos or simple jobs that will be printed with office printers.

The Identifier can only be used in these four colors. The only exceptions are the versions in negative and positive.

CMYK	RGB	Web
C: 0 M: 80 Y: 100 K: 0	R: 239 G: 90 B: 36	EF5A24
C: 100 M: 35 Y: 100 K: 10	R: 3 G: 99 B: 3	036303
C: 0 M: 35 Y: 100 K: 0	R: 249 G: 174 B: 59	F9AE3B
C: 85 M: 100 Y: 10 K: 4	R: 82 G: 17 B: 132	521184

correct use

GAYA

Every application of GAYA brand identity should strengthen and reinforce the organisation's positive image. Development of the identity should be done with care and with the highest quality standards possible.

The logo is a fixed design element that may not be edited or changed in any way. The logotype may only be reproduced graphically as described in this document.

White background

The ideal background for the corporate Identifier is a white background.
The blue color can also go on light photo backgrounds

logo variations

GAYA

When the use of the main forms of the logo is not possible, one of the logo variations of the logo should be used instead. Those logo variations allow to hold enough contrast between the logotype and its surroundings to maintain legibility.

Colored background

If the background has a black value equal to or more than 60 percent, the reversed Identifier (in white) should be used..

positive | negative

GAYA

White logo

The white logo is used on black, blue, red backgrounds and on dark photo backgrounds.

Black logo

The black logo version is used only on black-and-white materials.

Grayscale/Monocromatic version

The grayscale and the monocromatic version have been specifically designed to meet some specific printing requirements.

to ensure the logo is not the victim of aesthetic vandalism, do not change, alter, or modify any part of the logo

minimum size

GAYA

The following are specific guidelines related to the sizing of the GAYA logotype. The minimum logo size in all usages is 2 cm wide. The logo cannot be smaller than 1 cm wide.

Minimum size

A minimum logo size has been defined to ensure readability and printability. The minimum width of the logo, excluding the protection area, is 20 mm in printed materials and 100 pixels in web materials.

Protection area

The logo should always be placed in a prominent position, so it appears clear and distinct. The immediate vicinity of the logo is kept clear of other visual elements by surrounding it with a protection area (clear space).

Logo size | horizontal logo

Minimum logo size with lettermark : 2cm

Minimum logo size without lettermark : 1cm

legibility : clear space requirements

GAYA

An **exclusion zone** around the logo has been created to protect its integrity and make sure the logo is easy to read. Thinkcha's logo must stand out in all uses. Maintain clear space on all sides of the logo. The free zone stops the logo competing with other elements and graphic expressions.

The height of the letter "A" of the logo is taken as a guide to define the exclusion zone. The minimum clear space above and under the logo is equal to its height. The clear space to the left and right of the logo is equal to its width .

GAYA icon/pictogram

The same as the logo, the clear space on all sides of the pictogram is equal to the letter "A" of the logo.

“words have meaning. Type has spirit. The combination is spectacular.”

- Paula Scher

typography

GAYA

The institutional and official typography for GAYA's logotype/isotype and also for promotional materials is the Arkhip. It was carefully selected for its flexibilityand legibility. It also combines a futuristic, solid and sober characteristics and communicates the concepts of modernization/innovation.

The font can be used for example in headlines, subtitles and body texts. It's a key element of our brand identity as it maintains the design language of the logo.

typography

SECONDARY FONTS

Montserrat for substitles

This is the font used in our baseline. It's modern and sophisticated . It feels authentic and familiar. It's our secondary official typography and can used for content where primary typographic style is not needed. The font can be used for example in small text, technical information and body texts.

For content and information, documents and electronic media : **ITC Avant Garde Gothic**

Informative elements are e.g. small texts (10 pt and below), symbol descriptions, captions or info boxes. The colour of the text can be the blue, white, black or either of the two balancing greys. Additional bright colours can also be used to highlight important information or elements such as numbered lists.

Fundamentally, computers just deal with numbers. They store letters and other characters by assigning a number for each one.

signature usage

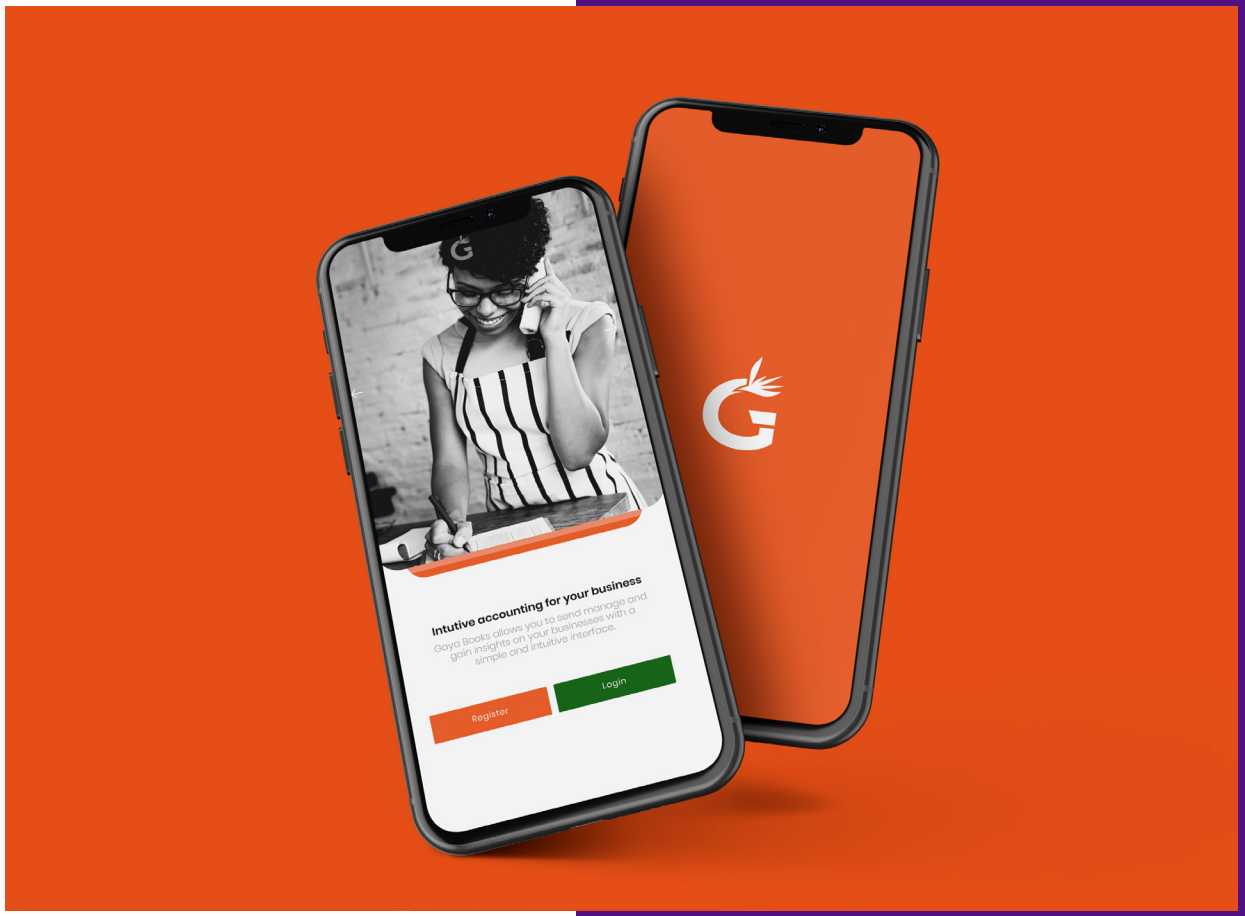

GAYA

GAYA's symbol or logo is applied to the top or bottom corners . Signature is strong and clean and should always be treated with respect in its usage. Isolating the signature in this way protects it from being distorted by other imagery, graphics and page trim. It can be applied in colour or in negative, depending on the video/photo requirements.

Standard signature

The standard full-colour horizontal version of the signature must never be used at a width of less than 70mm. The standard single-colour horizontal version of the signature must never be used at a width of less than 60mm.
